

New Land Taken In for Bigger Acreage elery Potatoes

Growers in the Glades section of Palm Beach County are expected to plant record acreages to cash potatoes and celery this fall, County Agent M. U. Mounts reports today.

Reports to Mr. Mounts indicate that between 2,500 and 3,000 acres will be planted to potatoes, and more than 3,500 acres will be planted to celery. If these ac-

By Malcolm Miller

Rosalind Russell and Brian Aherne, two of Hollywood's outstanding players, are teamed in one of the funniest of comedies under the title "What A Woman" which comes to the Prince Theatre this Sunday-Monday. Assisting this clever pair are well known players as Willard Taylor, Alan Dinehart, Edward Fielding, Alan Savage, Norma Verden, Douglas Wood, Grady Sutton, and

THOUSANDS OF ARMY VEHICLES USE SINCLAIR LUBRICANTS

In saving wear, and avoiding breakdown in the U. S. Army uses Sinclair lubricants in tanks, trucks, and other vehicles. Your Sinclair Dealer has the same quality lubricants to reduce wear in your car.

To save engine wear, he has Sinclair Opaline Motor Oil. Opaline stands up better and lasts longer because it is not only de-waxed but also de-felted. Play safe, have your Sinclair Dealer drain and refill your crankcase with Opaline every 1,000 miles.

Do You Know This Man?

He is your electric repair dealer... and he is on the go... day and night, keeping electrical equipment working in spite of war time handicaps.

Bill is doing a great job, in spite of the handicap of labor shortage, lack of transportation, shortage of parts, tools and materials. Bill is typical of today's Electrician. His experience and skill are always at your service.

So, on behalf of Bill, we ask the indulgence of customers in connection with the difficulties the war has brought on.

Bill is anxious to serve you. But, before you call him, make these checks, which may save you the cost and inconvenience of an unnecessary call, and allow him more time for essential repair jobs.

Bill will be there when you need him... you can depend on that. No one knows better than your repair dealer that **BETTER CARE MEANS LESS REPAIR**.

1. Is the appliance connected?
2. Explain the plug at the end of the cord.
3. Is there electricity at the outlet?
4. Check for loose in the cord.
5. Check the fuse.

pert handling of the directional end, make this one of the most interesting and wholly delightful comedies that anyone would want to see.

For your Tuesday-Wednesday evening you can get yourself a good fix of a burlesque picture on this program. This one is "Revenge of the Zombies," and the cast lists John Crenshaw, Gale Storm, Robert Lowery, Mantan Moreland and Bob Steele, who was borrowed from the Western studios for this picture.

According to the press books the story is a constant succession of amusing situations, and deals with the death of human beings who move in the sphere of the half-world between life and death.

On the same program comes "Shake Hands with Cooper," which was written by the late Frank Zeldes, Douglas F. Gray, Jack Raymond and Chas. M. Chas.

According to the story Patry Brown and Eddie Jones are the main characters. They are the main characters in the story. They are the main characters in the story.

Staturday brings another story for the members of the Six Shooter Club when an all star cast presents "Trail Riders," which will measure up to the average Western picture.

At 10:30 p.m. for this week's offering, the offerings for this week are: "I'll See You at the Movies," "Mystery Opening Date," and "The Mystery of the Mystery."

PSYCHIC OPENING DATE IS DELAYED A WEEK

TALLAHASSEE, Aug. 24. President Frank B. Campbell announced today that because of the emergency of the war, the opening of the Florida State College for women will be postponed from Sept. 1 to Sept. 15.

All freshmen will report Sept. 15. The rest of the freshmen will be registered on Sept. 21 and 22.

However, Dr. Campbell said, because of emergency, private requests for housing it is possible some students may not be required to report for registration until Sept. 25. They will receive special notice as to when to arrive.

"Special arrangement" will be made to register those who come late, and no loss of chastity will be involved.

HURT IN DAMAGE WOULD BE A REASON

Only in cases of extreme emergency, such as damage caused by fire, flood, earthquake or war, will the Federal Housing Agency agree to exempt profit-making contractors from the usual rules for getting money to repair, erect or improve War Production Board approved housing for war workers, the F.H.A. says.

"If your house is so damaged as to be unfit for use unless you apply to the Federal Housing Agency for a full and complete repair," the F.H.A. says, "it is your responsibility to obtain repairs for any but the most essential emergency repairs."

SYNTHETIC QUININE SOURCE IS FOUND

ST. AUGUSTINE, Aug. 24. (P.N.S.) St. Augustine and St. Johns county have had their share in some of the new discoveries and inventions of this war. The quinine substitute and the para-quinine, which is a synthetic quinine, are now being produced in large quantities at the St. Augustine Ordnance Plant.

Richard Delano and William Moser, in the employ of another chemical concern, conducted experiments that resulted in the invention of a device by which salt water can be changed to fresh water in use by the armed services.

WATER PLANT

The United States Sugar Corporation at Clewiston has received approval for the installation of a new water treatment plant at this place. The new plant will have a capacity of 500 gallons of water per hour and will use the same process as that which will be used for water purification at the new starch plant.

Illinois Man Speeds Up His Haymaking

Tractor-Drawn 'Sled' Used to Pick Up Bales

A clever method of saving labor in haymaking has been worked out by L. M. Houser Jr., near Farmer City, Ill. Houser built a sled which he pulled by a tractor. The sled is 20 feet long and 4 feet wide, and it has a large wheel at each end. It carries 20 bales, when loaded three bales high.

The sled is pulled by a tractor, and it carries 20 bales, when loaded three bales high. The sled is pulled by a tractor, and it carries 20 bales, when loaded three bales high.

At the corner of one turn there is an elevator running up over the side of a wooden chute. It carries a load of hay to the top of the sled. The sled is pulled by a tractor, and it carries 20 bales, when loaded three bales high.

The sled is pulled by a tractor, and it carries 20 bales, when loaded three bales high. The sled is pulled by a tractor, and it carries 20 bales, when loaded three bales high.

Make these minor repairs now, before having a slip.

Larger Hybrid Acreage To Swell Corn Output

Increased plantings of hybrid corn are expected to swell the output of the 1944 crop. The U. S. Department of Agriculture reports that the acreage of hybrid corn is expected to be 10,000,000 acres, compared with 9,000,000 acres in 1943.

Make these minor repairs now, before having a slip.

More Citrus Fruit

Total citrus fruit production for 1944-45 is expected to be about 60 per cent above 1943-44 and about 20 per cent above the average annual production of 1939-40. The U. S. Department of Agriculture reports that the larger acreage is credited with the expected increase.

TELEFACT

U. S. SOLDIER EATS MORE THAN CIVILIAN

AVERAGE DAILY CONSUMPTION

Each soldier consumes 100 calories more than a civilian.

When the average U. S. civilian gets into the army he consumes three times as much cotton per year in terms of cotton goods as he did as a civilian—75 pounds. In combat he uses several times this 75 pounds.

Boybean acreage has increased 44 per cent since 1941, according to War Food Administration statistics. About 70 per cent of the total national soybean crop is grown in the North Central states.

Soil Conservation Steps Up Yield 21%

Big Advance Was Made in Last Decade

Leading large among factors contributing to the American farmer's record production job on food and fiber for war is the notable increase shown in acre yields of vital crops.

Per acre yields of major crops during the years 1934-43 were 11.8 per cent greater than yields in the pre-conservation practices decade of 1923-32, according to government figures.

Per acre yields of major crops during the years 1934-43 were 11.8 per cent greater than yields in the pre-conservation practices decade of 1923-32, according to government figures.

Fertilizing Tomatoes

Two research men of the state department at the University of Wisconsin, found that tomatoes need a lot of fertilizer and pay a big profit on it, even on land that already is good fertile.

They report that compared with unfertilized tomatoes the best treatment increased yields enough to net \$34 extra to the acre above fertilizer cost. This was on the basis of the 1943 harvest price, actually higher than the 1942 price.

The 6-20-20 fertilizer, which was broadcast just as good results as more expensive formulas containing larger amounts of either nitrogen or phosphorus.

These results were secured on a Miami soil which contains medium to high amounts of phosphorus, a fair amount of potassium, plenty of boron and has a reaction ranging from being neutral to slightly alkaline.

The variety of tomatoes grown was a rather late one named J. T. H. Houser and Truett think it possible that an earlier variety would have paid off even better on fertilizer, since also the yield of this variety was caught by frost before it ripened.

Campaign Argument

His business being to neglect the Democratic National Committee, with headquarters in Washington, issues a weekly "clip sheet" a clip sheet being a sheet of paper on which are printed articles that editors are asked to cut out for the office scissors and send it to the committee. The best argument the committee offers the best argument it can think of. Here it is: the one that is offered in the Clip Sheet of August 10.

"Has the Republican Party found a leader in Thomas E. Dewey? Has the country found a leader?"

"The answer to the first question was given in part by the presidential nominee when he addressed the men and women who had chosen him. It will be given more fully as the campaign progresses. And it will need to be given more fully. The acceptance speech left the hopeful delegates with the impression that their story would be told vigorously and confidently by their candidate; but it did not electrify them.

"The answer to the second question will be given only if Mr. Dewey is elected. The country wants leadership. That is always so in times of crisis. Mr. Harding seemed good enough in 1920, Mr. Coolidge in 1924 and Mr. Hoover in 1928. In these election years the national disposition was to get along without a leader. But when the walls came tumbling down, they went up for a leader and in 1932 Mr. Roosevelt was elected by a nation that believed he possessed the qualities a leader should possess.

"If the country decides to make a change this year it will be because the country believes Mr. Dewey is more of a leader than Mr. Roosevelt. We may talk about the campaign 'issues', but we will be thinking about the personal capacities of the two men. We will be making up our minds, as the weeks go by, on that one simple, but supreme question: Which is the better able to lead the country through the critical years immediately ahead of us?"

"Republican voters, the rank and file, the noncoms and the lesser leaders of the party, already have shown their faith in Mr. Dewey's ability to lead the party. They demonstrated this fully before the convention met that there was nothing for the two-star and three-star generals of the party to do but accept their decision. Now, however, Mr. Dewey must justify this faith. To do this he must turn a dubious party organization into an active fighting force. He can choose some of his aides, but like it or not, he must depend for the most part on the very men who obtained the least pleasure from his nomination.

"These are the Governors, Senators, national committeemen and other top-flight party people who have made so little effort to cool their feeling toward him. A feeling not helped greatly perhaps by the young candidate's announcement that he would have a cabinet of young men; some of those elderly politicians on whom Dewey is forced to rely might begin to see greater merit in the candidate if he indicated an intention to gather about himself a group of older statesmen."

"No general would enjoy going into battle surrounded by a general staff such as Mr. Dewey has inherited. Can he turn it into something different? Can he persuade these State and local leaders to put their shoulders to the wheel and their hearts behind their shoulders? Mr. Wilkie, in a similar situation was not notably successful. Mr. Dewey must do better if he is to convince the voters that he is a leader."

Patch of Culinary Herbs

Helps Fill Spice Needs

If you plan to plant herbs for the first time, start with a few varieties. Select such old-time favorites as dill, sage, parsley, sweet marjoram, chives, and caraway that can pinch-hit for some of the season's new cut off because of shipping conditions.

Plant only what you can use to good advantage. Garden space is at a premium this year and seeds—even of herbs—are none too plentiful. Flavors and odors of most culinary herbs are highly concentrated, and only a very small amount is needed to season a quantity of food. Overplanting means a waste of time and energy as well as a waste of soil and seed.

Most herbs will do well on any rich, well-drained garden soil. All annual herbs and most of the biennials and perennials are grown from seed, but the mints, lemon balm, sage, and chives are propagated by cuttings or by division.

Telephone Lines to the Front

As battles roll on to victory and vast new areas are conquered, the need for tremendous amounts of telephone equipment becomes more and more urgent.

Since the start of the war the huge telephone manufacturing plants of the Bell System have been concentrating on the manufacture of telephone equipment for war use exclusively, to insure that there shall be no shortages of telephone equipment on the war fronts.

Just before war started, the Southern Bell Company completed a large program of expansion of central office and outside plant facilities. This enabled us to continue installing telephones after the manufacture of telephone equipment for civilian use had stopped.

Now, however, the normal reserves of switchboards, wires, cables and instruments have been used up, and we have many people on our waiting lists for service. But war's needs must come first, so for some time we at home shall continue to make the most and the best use of what we now have.
